*per 100 value

The county is providing this table of property tax rate information as a service to the residents of the county. Each individual taxing unit is responsible for calculating the property tax rates listed in this table pertaining to that taxing unit and providing that information to the county.

The **Adopted Tax Rate** is the tax rate adopted by the governing body of a taxing unit.

TRUTH IN TAXATION SUMMARY

Texas Property Tax Code Section 26.16

No-New-Revenue Tax Rate

The no-new-revenue tax rate enables the public to evaluate the relationship between taxes for the prior year and for the current year, based on a tax rate that would produce the same amount of taxes if applied to the same properties taxed in both years. 9

Although the actual calculation is more complicated, a taxing unit's no-new-revenue tax rate generally equal to the last year's taxes divided by the current taxable value of properties that were also on the tax roll last year. 10 The resulting tax rate, used for comparison only, shows the relation between the last year's revenue and the current year's values.

Voter-Approval Tax Rate

The voter-approval tax rate is a calculated maximum rate allowed by law without voter approval. 11 Most taxing units calculate a voter-approval tax rate that divides the overall property taxes into two categories - M&O and debt service. 12

The voter-approval tax rate provides cities and counties with about the same amount of tax revenue it spent the previous year for day-to-day operations plus an extra three and a half percent for operations and sufficient funds to pay debts in the coming year. For special taxing units, junior college districts and hospital districts, the voter-approval tax rate provides an extra eight percent increase for operations and sufficient funds to pay debts in the coming year. 13

School districts voter-approval rate is equal to the district's maximum compressed rate plus the greater of the previous year's enrichment rate or five cents per \$100 of taxable value. They then add the debt rate to get the final voter-approval tax rate. 14 School districts should consult the Texas Education Agency for guidance on compression rates.

For all taxing units, the debt rate portion of the voter-approval tax rate is the current year's debt payments divided by the current year's property values. The debt rate may rise as high as necessary to cover debt expenses.
